

Twist Mop with Absorbent Twisted Strands

This twist mop features a durable yellow handle with a comfortable green grip. Its mop head consists of absorbent twisted strands and a twist mechanism for easy wringing, making it suitable for residential and commercial use.

Product Overview

Professional Cleaning Performance

The JM-3021 Twist Mop is engineered for both residential and commercial environments, providing a versatile solution for effective floor maintenance. Featuring highly absorbent twisted strands, it excels at lifting dirt and managing spills across various floor surfaces. The integrated twist mechanism simplifies the wringing process, allowing for efficient water removal and reduced drying times.
