

Twisted Pair Communication Cable

This communication cable features twisted pair conductors for reliable data transmission. Designed for various networking applications, this cable ensures optimal signal integrity and minimal interference.

Overview

High-Performance Communication Cable

This high-performance communication cable features twisted pair conductors engineered for reliable data transmission across various networking applications. It is designed to ensure optimal signal integrity while minimizing interference, making it a dependable choice for demanding environments. The cable includes multiple color-coded twisted pairs, which facilitate easy identification and efficient termination during installation.

Technical Specifications

Model Identifier	SC6503
Series	EXCELY
Cable Type	Twisted Pair, Communication

Design & Durability

Construction Features

- Color-coded twisted pairs for easy identification
- Durable outer jacket
- Designed for minimal interference
- Optimized for signal integrity

Protection

Environmental Resistance • Physical Protection
