

Twisted Pair Communication Cable

This is a twisted pair communication cable with a red outer sheath. It contains two twisted pairs of insulated copper conductors for signal transmission.

Product Overview

Professional Communication Cable

This high-quality twisted pair communication cable is engineered for reliable signal transmission in professional communication systems. Featuring a durable red outer sheath, the cable is constructed with two twisted pairs of insulated copper conductors. The cable is clearly marked with the specification SYT 2X2X0.8, ensuring easy identification for installation and maintenance.

Technical Specifications

Cable Type	SYT
Number of Pairs	2
Conductor Diameter	0.8 mm

Construction & Materials

Outer Sheath Color	Red
Conductor Material	Copper
Insulation Colors	Blue, White, Red, Yellow
