

Twisted Pair Data Cable

This twisted pair cable is designed for reliable data transmission in networking applications. It features four twisted pairs of solid conductors, ensuring optimal signal integrity and minimizing interference.

Overview

High-Performance Data Transmission

This high-performance twisted pair cable is engineered for reliable data transmission across diverse networking applications. Featuring four solid conductor twisted pairs, the design ensures optimal signal integrity while effectively minimizing electromagnetic interference. Built with durable insulation and a robust outer jacket, this cable is designed for long-lasting performance even in demanding networking environments.

Technical Specifications

Conductor Configuration	4 Twisted Pairs
Conductor Type	Solid
Signal Integrity Features	Interference Shielding, High-Performance Transmission

Construction

Construction Details

- Durable insulation
- Robust outer jacket

Applications

Suitable Applications

Networking Protocols • Data Transmission • Demanding Environments
