

Twisted Wire Section Brushes, 75-175mm Diameter

These section brushes feature a standard twist design and range from 75mm to 175mm in diameter. The twisted wire construction provides aggressive action for cleaning, deburring, and surface preparation on various materials.

Product Overview

Industrial Twisted Wire Section Brushes

These twisted wire section brushes are engineered for high-performance cleaning, deburring, and surface preparation. Designed specifically for accessing hard-to-reach areas such as edges and corners, the robust twisted wire construction ensures aggressive and consistent performance. Suitable for metal, wood, and various industrial materials, these brushes are a reliable choice for demanding machine-tool applications.
