

Two-Burner Countertop Gas Stove

This two-burner gas stove features a floral-patterned glass top and a white base. Each burner is controlled by a black knob located on the front of the unit.

Product Overview

Professional Countertop Cooking Solution

This two-burner countertop gas stove is designed for efficiency and durability in a compact form factor. Featuring a sleek tempered glass panel and heavy-duty cast iron burners, it provides a stable and reliable cooking surface suitable for various culinary environments. The integration of auto piezoelectric ignition ensures quick and safe startup, making it a practical choice for professional kitchens requiring high-performance, space-saving equipment.
