

# Two-Core PVC Insulated Cable

This two-core PVC insulated cable is designed for general purpose wiring, lighting, and power applications. It features stranded copper conductors and PVC insulation suitable for indoor use.

### ADDITIONAL IMAGES

## Product Overview

### Professional Electrical Cabling

This two-core PVC insulated and sheathed cable is engineered for reliable performance in construction and interior wiring applications. Featuring flexible copper conductors and a durable PVC jacket, it offers excellent moisture and chemical resistance for indoor installations. The cable is manufactured to meet rigorous industry standards, ensuring safety and efficiency for both residential and commercial electrical projects.

## Technical Specifications

Rated Voltage	300/500V or 450/750V
Conductor Cross-Sectional Area	1.5 mm <sup>2</sup> , 2.5 mm <sup>2</sup>
Standard Length	100 m
Industry Standards	JB/T 8734.2-2016, GB/T 5023.3-2008, 60227IEC01

## Performance Metrics

### Key Performance Attributes

- Stranded copper conductors for flexibility
- Moisture and abrasion-resistant PVC sheath
- Suitable for lighting and general power applications
- Reliable indoor electrical performance
