Overview

Efficient Cooling Solution

This two-door bottom freezer refrigerator offers a balanced storage solution with a total capacity of 206 liters, featuring a 131-liter fridge and a 75-liter freezer. Designed for efficiency and performance, it utilizes a high-quality compressor, operates with low noise, and is CFC-free for environmentally conscious cooling. The modern, space-saving design includes a curved glass door and an organized interior, making it an ideal choice for residential or professional kitchen environments.
