

Two-Door Compact Refrigerator

This compact refrigerator is designed with two doors and a separate top freezer compartment. Adjustable shelves and door racks optimize interior storage while its cooling system maintains consistent temperatures.

Product Overview

Compact Refrigeration Solution

The BCD-103 is a compact and efficient two-door refrigerator designed specifically for smaller spaces such as apartments, dorm rooms, or offices. It features a separate freezer compartment at the top, providing versatile storage options for various food items. With its energy-efficient operation and consistent cooling performance, this unit offers a practical and reliable solution for professional and personal use.
