

Two-Door Refrigerator with Digital Control Panel

This two-door refrigerator features independent air circulation and an LED display. Intelligent technology and a touch screen provide energy saving options.

Product Overview

Sophisticated Cooling Performance

This two-door refrigerator combines intelligent technology with an elegant design, featuring a vibrant red exterior and subtle floral patterns. Equipped with a digital touch screen control panel, it offers precise temperature management and independent air circulation for optimal food preservation. Designed with energy efficiency in mind, this appliance provides a reliable solution for professional and domestic cooling needs.
