

Two-Door Refrigerator with Top Freezer

This refrigerator features a two-door design, including a top freezer compartment and a bottom refrigerator section. The interior is equipped with multiple shelves and door compartments for organized storage.

Product Overview

Efficiency and Organization

The DCD-180C is a reliable two-door refrigerator designed for efficient food storage in professional or residential environments. Featuring a classic top-freezer configuration, it provides easy access to frozen goods while maintaining a dedicated, spacious lower refrigerator compartment. With a balanced 180L capacity, this unit is built for optimal organization through multiple shelves and integrated door compartments.
