

Two-Door Top-Freezer Refrigerator with LED Lighting

This refrigerator features a two-door design with a top freezer compartment and energy-saving technology. It is equipped with white LED lighting for clear visibility and efficient operation.

Product Overview

Intelligent environmental temperature transmitter for automatic seasonal compensation.

Efficient Cooling Performance

This two-door top-freezer refrigerator is designed for professional household needs, integrating advanced energy-saving technologies such as high-efficiency compressors and optimized heat exchange systems. It features intelligent environmental temperature sensing for automatic compensation, ensuring consistent performance regardless of seasonal climate changes. With its sleek design and bright, long-lasting LED lighting, this unit provides both aesthetic appeal and practical functionality for modern food storage.

Key Features

Key Highlights

Energy Saving, Intelligent Temperature Control, LED Interior Lighting, R600a Refrigerant, Double Door Gaskets

Performance Data

Schematic illustration of the energy transfer and cooling system operation.

Technical Specifications

Feature	BCD-177CHR2A	BCD-197CHR2A	BCD-207CHR2A
Net Volume (L)	177	197	207
Freezer Volume (L)	68	68	68
Input Power (W)	100	100	100
Daily Consumption (Kw.h)	0.34	0.34	0.37

Technical Specs

Energy Star Rating	3 stars
Lighting Type	White LED
