

Two-Gang Two-Way Light Switch

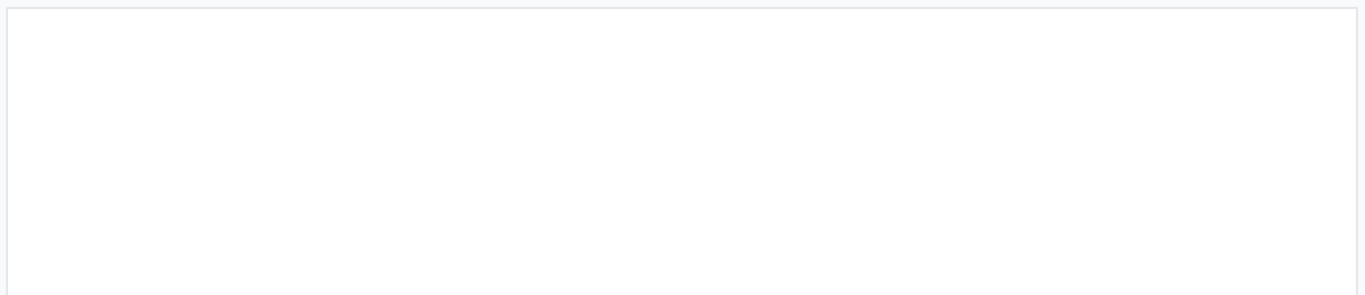

This two-gang, two-way light switch controls two separate lights from two locations. It features a fire-resistant PC housing and offers options for screw or screw-less terminal connections.

ADDITIONAL IMAGES

Overview

Modular design featuring two individual switch plates within a unified frame.

Premium Modular Lighting Control

This S81 Series two-gang, two-way light switch offers a sophisticated and flexible solution for modern electrical installations. Featuring a unique 4-degree button swing angle for an elegant aesthetic, it utilizes a pendulum structure for rapid circuit switching. The modular design allows for extensive customization with various cover materials and easy inventory management for professional contractors.

Technical Performance
