

Two-Hole Cast Iron Coupling

This cast iron coupling features two pre-drilled holes for secure connections. It is designed for applications requiring robust and stable joining of components.

Product Overview

Robust Two-Hole Cast Iron Coupling

This durable cast iron coupling is engineered for secure and reliable connections in industrial applications. Featuring two pre-drilled holes, it ensures stable and precise joining of components. Designed for longevity and optimal performance, this coupling is a dependable choice for demanding mechanical assemblies.

Technical Specifications

Material	Cast Iron
Mounting Holes	2
Key Features	Durable, Precision-Engineered, Secure Connection
