

Two-Part Epoxy Adhesive Putty for Repair

This two-part epoxy system is designed for casting repair. It provides strong, durable bonds that resist wear, corrosion, and impact.

Product Overview

Professional Casting Repair Solution

This two-part epoxy adhesive putty is specifically engineered for industrial casting repair, offering a reliable solution for filling defects in iron and steel. It is effective at repairing sand holes, pores, and cracks, ensuring structural integrity in metal components. Designed for durability, the adhesive creates permanent bonds that are highly resistant to wear, corrosion, and impact.

Technical Specifications

Primary Application	Casting repair (iron, steel)
Net Weight per Tube	50 g
Net Weight per Box	100 g
System Type	Two-part epoxy system

Quality & Standards

Quality Management Systems	ISO/TS 16949
----------------------------	--------------

Key Features

Performance Attributes

1 High Wear Resistance	1 High Corrosion Resistance	1 High Impact Resistance
----------------------------------	---------------------------------------	------------------------------------

Key Benefits

- Easy to use
- Creates permanent repairs
- Suitable for various metal materials
- Versatile structural adhesive
