

Two-Part Epoxy Steel Adhesive

This two-part epoxy steel adhesive system is designed for quick, durable repairs. It features a 5-minute set time, allowing rapid bonding of metal surfaces.

Product Overview

High-Performance Epoxy Steel Adhesive

This two-part epoxy steel adhesive system is engineered for rapid, durable repairs on metal surfaces. Featuring a 5-minute set time, it provides an efficient solution for industrial, automotive, and household bonding needs. The system requires mixing the resin and hardener components to create a robust, steel-reinforced bond.

Technical Specifications

Set Time	5 minutes
Net Weight	56.7 grams
System Type	Two-part system (Resin and Hardener)

Application

Ideal Applications	Automotive, Industrial, Household Repairs, Metal Bonding
