Product Overview

Versatile Power Connectivity

This two-pin to universal socket power adapter is designed for reliable electric power transmission and distribution. Engineered with durable ABS material and high-quality copper components, it ensures consistent performance for various electrical applications. The adapter features a flexible design capable of accommodating different pin sizes, making it a practical solution for international connectivity needs.

Technical Specifications

Pin Diameter

- 4.0mm
- 4.8mm

Construction Materials

ABS Plastic, Copper
