

Two-Pole Induction Motor Water Pump

This two-pole induction motor water pump is designed for efficient and reliable water circulation. It features thermal protection for single phase and is suitable for various applications.

Product Overview

Reliable Water Circulation

This two-pole induction motor water pump is engineered for efficient and reliable water circulation in both residential and commercial settings. It features a robust construction with a durable motor and impeller designed for quiet operation and long-lasting performance. With thermal overload protection included, it is built to prevent motor damage and ensure consistent reliability for water supply, pressure boosting, and heating or cooling system circulation.

Technical Features

Motor Type	Two-Pole Induction Motor
Safety Features	Thermal Overload Protection

Applications

Suitable Liquids

- Clean water
- Non-chemically aggressive liquids

Common Applications

- Domestic water distribution
- Civil applications
- Pressure sets
- Liquid transfer
- Garden irrigation
- Heating and cooling systems

Installation

Installation Requirements	Must be installed in an enclosed environment or sheltered from inclement weather.
