

Two-Post Automotive Lift

This two-post car lift is designed for automotive maintenance and repair. It features a robust steel frame, hydraulic lifting mechanism, and adjustable support arms for secure vehicle positioning.

Overview

Professional 4.2T Two-Post Lift

This high-performance two-post automotive lift is engineered for professional workshops and garages, offering a robust 4.2-ton lifting capacity. Designed with a clear floor configuration and a generous 2850mm internal width, it accommodates a wide range of vehicles, including SUVs and BPVs. Safety is prioritized through rigorous 120% dynamic and 150% static load testing, alongside explosion-proof valves and a manual release system for power-off scenarios.

Performance Metrics

Rated Lifting Capacity

4.2 T

Lifting Capacity

Max Lifting Height	1930 mm
Minimum Height	90 mm

Technical Specifications

Electrical & Control

- Aluminum motor (heat resistant)
- IP54 ABS control box
- 24V operation voltage

Design Features

Clear floor design • Explosion-proof valve • Multifunctional hydraulic valve board • Door protection rubber pad • Toe protection

Safety Certifications & Compliance	CE, 120% Dynamic Load Tested, 150% Static Load Tested
