

# Two-Prong AC Power Plug

This is a standard two-prong AC power plug, commonly used for low-power electronic devices. It features two flat, parallel blades for insertion into a corresponding electrical outlet.

## Product Overview

### Professional Grade AC Power Plug

This standard two-prong AC power plug is specifically designed for low-power electronic devices requiring a reliable connection to 120V electrical systems. Engineered for durability, it features a robust molded construction that ensures consistent insulation and long-term performance. Its non-polarized, parallel-blade design offers versatile, user-friendly installation for a wide range of industrial and consumer electronics applications.

## Technical Specifications

Voltage Rating	120 V
Plug Configuration	Non-polarized two-prong parallel blade
Material	Molded Plastic, Rubber

## Key Features

### Core Advantages

- Non-polarized for flexible orientation
- Durable molded insulation
- Standard parallel blade design
- Optimized for low-power electronics
