

Two-Speed Heavy-Duty Drilling and Tapping Machine

This heavy-duty drilling machine features a two-speed motor for strong power. It is equipped with automatic tool extraction and a two-step power feed for drilling and tapping operations.

Product Overview

High-Performance Industrial Drilling Solution

This two-speed heavy-duty drilling and tapping machine is engineered for precision metalworking in demanding industrial and workshop environments. Its robust construction ensures stability during operation, while the powerful motor and multiple speed settings provide the versatility needed for efficient drilling and tapping tasks. Featuring a large adjustable work table and integrated safety mechanisms, this machine is designed to deliver accurate, repeatable results for professional buyers.

Performance & Capability

Performance Highlights

2 Modes

Speed Settings

Operation Modes

Drilling, Tapping, Heavy-Duty

Design & Construction

Construction Features

- Robust heavy-duty frame
- Blue and white industrial finish
- Large adjustable work table
- Integrated depth stop for repeatability

Safety & Compliance

Safety Systems

Emergency Stop Button • Chuck Guard

Operator Protection

Safety is prioritized through the inclusion of a dedicated emergency stop button for immediate power cutoff and a protective chuck guard to shield operators during high-speed drilling and tapping operations.

Applications

Ideal Applications

- Industrial manufacturing
- Metalworking workshops
- Precision engineering
- Repeatable drilling operations
