

Two-Stroke Gasoline Engine for Brush Cutters

This 2-stroke gasoline engine is designed for brush cutters and trimmers. It features a compact design, air-cooling system, and recoil starter for reliable performance.

Overview

High-Performance 2-Stroke Engine

This 2-stroke gasoline engine, model 1E44F-2, is engineered specifically for handheld power equipment such as brush cutters and trimmers. Its compact, air-cooled design ensures reliable performance and efficient fuel consumption during demanding outdoor tasks. Featuring a standard recoil starter and robust internal components, this unit is built for easy maintenance and consistent power output.

Technical Specifications

Model Number	1E44F-2
Engine Displacement	51.7 ml
Net Weight	4 kg

Performance

Maximum Power

1.4 kW

Power

6500 r/min

Rated Speed

Features

Key Features	2-Stroke, Air-Cooled, Recoil Starter, Compact Design
