

Two-Tier Electric Space Heater

This electric space heater features two tiers of heating elements for efficient warming. Designed for indoor use, it provides radiant heat with adjustable settings.

Product Overview

Efficient Two-Tier Radiant Heating

This two-tier electric space heater is designed for effective localized warming in indoor environments. Featuring dual horizontally oriented heating elements, it provides consistent radiant heat to improve comfort. The unit is built with a sturdy circular base and a user-friendly control panel for easy heat adjustment, making it a reliable solution for supplementary heating needs.

Technical Specifications

Design Type	Two-tier vertical pole mount
Heating Mechanism	Radiant heat
Finish	Silver finish
Usage Environment	Indoor, Commercial, Office

Safety & Control

Safety Features

- Protective metal heating element grids
- Stable circular base

Control Interface	Integrated base control panel
