

Two-Tier Metal Workbench with Pegboard

This two-tier metal workbench features a sturdy metal frame with adjustable legs and a lower shelf for storage. The pegboard back panel allows for easy organization of tools and accessories, while an overhead light provides ample illumination for the work area.

Overview

Professional Two-Tier Workbench

This durable two-tier metal workbench is designed to provide an efficient and organized workspace for demanding garage, workshop, or hobby environments. It features a robust metal frame, an integrated pegboard for convenient tool storage, and a built-in overhead light to ensure precision during tasks. With its adjustable legs and lower storage shelf, this station offers both ergonomic flexibility and essential workspace optimization.
