

Two-Tone Pharmaceutical Capsules for Encapsulation

These two-tone capsules are designed for pharmaceutical use, featuring a green and gray color combination. They are suitable for encapsulating powders, granules, or liquids for oral administration and can be customized.

Product Overview

Professional Pharmaceutical Encapsulation

These two-tone pharmaceutical capsules are engineered for high-precision oral administration of powders, granules, or liquids. Designed with compatibility for automated filling equipment, they ensure efficiency and consistency in large-scale manufacturing environments. The customizable color-coding and sizing options provide flexibility for specific drug formulations and dosage requirements.
