

Two-Way Full-Band Passive Speaker

This is a two-way full-band passive speaker designed for professional audio. The cabinet is durable and allows for easy installation, with a constant directivity horn.

Product Overview

Professional Audio Excellence

The E series two-way full-band passive speaker is designed for professional audio applications requiring high-fidelity sound. Featuring a robust, durable cabinet and advanced passive crossover technology, it ensures low distortion and precise frequency positioning. This versatile speaker is an ideal solution for conference halls, KTV rooms, and stage monitoring environments.
