

# Two-Way Full-Range Passive Speaker

This is a two-way full-range passive monitor speaker from the ESeries. It features durable cabinet construction and easy installation.

## Product Overview

### Professional Performance Audio

The E-Series two-way full-range passive speaker is designed for high-standard audio applications requiring exceptional clarity and durability. Featuring a custom-engineered constant directivity horn and a robust low-distortion crossover network, this speaker delivers precise sound positioning and full-bodied bass. It is an ideal solution for conference halls, KTV rooms, and stage monitoring environments where transparent, high-fidelity sound reproduction is essential.
