

Two-Wheel Walking Tractor with Plow

This two-wheel tractor is designed for plowing and tilling soil on small to medium-sized farms. It features a single-cylinder diesel engine, lugged wheels for traction, and a rear-mounted plow.

Overview

Versatile Two-Wheel Walking Tractor

This two-wheeled walking tractor is designed for efficient soil cultivation in small to medium-sized agricultural settings. Featuring a robust single-cylinder diesel engine and a reliable belt-drive system, it offers the necessary power for demanding tilling and plowing tasks. Its compact design and high-traction lugged wheels ensure excellent maneuverability, making it an ideal choice for navigating confined spaces where larger machinery cannot operate.

Technical Specifications

Engine Type	Single-cylinder diesel
Drive System	Belt-drive
Primary Application	Plowing, Tilling, Soil Cultivation

Design & Features

Traction Features

Lugged Wheels • High-Traction Design

Control Mechanism

- Steering handles
- Manual control levers

Included Implements	Rear-mounted plow
