

TY160 Bulldozer

The TY160 bulldozer is a robust earth-moving machine designed for demanding construction and mining applications. It features a high-torque diesel engine, providing ample power for pushing, dozing, and grading tasks.

Overview

TY160 Bulldozer Performance

The TY160 is a robust earth-moving machine engineered for demanding construction and mining applications. It features a high-torque diesel engine that delivers reliable power for heavy-duty pushing, dozing, and grading tasks. Designed with operator comfort in mind, the machine includes an ergonomic cabin with a wide-view hexahedron design and adjustable seating to maximize efficiency during long shifts.

Engine & Drive

Engine Model	Steyr WD615-T1-3A
Drive System	Hydraulic-mechanical

Operator Environment

Cab Features	Hexahedron design, Wide view, Ergonomic operation system
Seat Adjustability	Yes

Safety & Monitoring

Monitoring System	Electronic with sound and light alarm
