Product Overview

Industrial Cam and Groove Solutions

This Type C cam and groove coupling provides a high-performance solution for rapid hose and pipe connection. Engineered for durability and ease of use, it eliminates the need for specialized tools while maintaining a secure, leak-proof seal for fluids, powders, and pellets. The inclusion of a Viton gasket offers superior chemical and fuel resistance, making it an ideal choice for demanding industrial and agricultural environments.

Technical Specifications

Compliance Standard

A-A-59326 • DIN 2828

Body Material	Aluminum
Size Range	1/2 inch to 8 inch
Seal Material	Viton, NBR, BUNA, EPDM
Available Threads	NPT, BSPP, BSPT

Performance Metrics

Operating Limits

250 psi

Max Pressure

-150 F

Min Temperature

250 F

Max Temperature

Components & Construction

Material Breakdown

Component	Material Options
Handles	Brass or Stainless Steel
Pins, Rings, Safety Clips	Carbon Steel (Plated) or Stainless Steel
Body	Aluminum
