

U-Shaped Immersion Heating Element

This U-shaped heating element is designed for immersion heating applications. It features a durable metal sheath and robust construction for efficient heat transfer.

Product Overview

High-Efficiency Immersion Heating

This U-shaped tubular heating element is engineered for reliable immersion heating applications in both industrial and commercial environments. Featuring a durable metal sheath and robust construction, it ensures efficient heat transfer and consistent performance. The design includes ceramic insulators at the terminals to enhance safety and operational longevity.

Technical Specifications

Design Shape	U-Shaped Tubular
Construction Features	Metal Sheath, Ceramic Insulators, Industrial Grade

Applications

Suitable Environments

- Industrial Heating
- Commercial Applications
- Immersion Heating
