Product Overview

Versatile U-Shaped Edge Protection

This high-performance U-shaped rubber edge trim seal is engineered to provide a robust, waterproof barrier across diverse environments. Designed for flexibility and durability, it effectively reduces noise, vibration, and rattling while protecting edges from abrasion and weathering. With compatibility across multiple material bases, it is an ideal solution for automotive, marine, industrial, and home furnishing applications.

Material & Construction

Production Craft

- Extrusion
- Molded
- Injection

Available Materials	EPDM, Silicone, NBR, Neoprene, PVC, TPE, TPV

Technical Specifications

Temperature Range

Material	Min Temp	Max Temp
EPDM	-40	120
Silicone	-60	300
PVC	-30	100

Key Features

Weather Resistant • Fire Retardant • Corrosion Proof • Abrasion Resistant • Waterproof

Applications

Primary Industries

- Automotive & Railway
- Marine & Shipping
- Construction
- Industrial Equipment
- Home Furnishing
