

U-Shaped Steel Bearing Channel

U-shaped steel channels provide support and housing for bearings. The components feature consistent dimensions for industrial applications.

Product Overview

Industrial U-Shaped Steel Channel

This U-shaped steel channel is engineered for robust performance in industrial machinery and bearing support applications. Crafted from durable steel with a consistent, unfinished surface, these components are designed for high-load environments where structural integrity is paramount. Its uniform dimensions ensure reliable integration into existing assembly lines or custom bearing housing systems.

Technical Specifications

Surface Finish

Unfinished • Industrial

Material

Steel

Part Identification

3603006

Profile Shape

U-Channel

Usage & Application

Typical Applications

- Bearing support
- Bearing housing
- Industrial machinery structure
