

U-Shaped Tubular Heating Element

This U-shaped tubular heating element is designed for immersion or insertion into heating systems. It is constructed from durable metal alloy for efficient heat transfer and long-lasting performance.

Product Overview

Industrial U-Shaped Heating Element

This U-shaped tubular heating element is engineered for high-efficiency thermal transfer in industrial and commercial heating systems. Designed for immersion or insertion, its durable metal alloy construction ensures reliable performance and longevity under demanding conditions. The robust design features top-mounted electrical connections for easy integration into existing equipment.

Technical Specifications

Heating Element Shape	U-Shaped
Primary Applications	Immersion Heating, Insertion Heating, Industrial Systems, Commercial Heating
Material Construction	Durable Metal Alloy
Connection Configuration	Top-mounted electrical connections
