

# UEC52LA Diesel Engine Cylinder Liner

This cylinder liner is engineered for UEC52LA diesel engines used in marine and industrial settings. It is made from high-strength alloy steel, offering exceptional wear resistance and durability.

## Product Overview

### UEC52LA Diesel Engine Cylinder Liner

This heavy-duty cylinder liner is precision-engineered specifically for UEC52LA diesel engines, widely utilized in demanding marine and industrial environments. Constructed from high-strength alloy steel, it offers exceptional wear resistance and durability under intense operating conditions. Its design features precision-machined surfaces that facilitate optimal piston ring sealing and efficient heat transfer, ensuring peak engine performance and reliability.

## Technical Specifications

|                          |  |
|--------------------------|--|
| Engine Compatibility     | UEC52LA  |
| Material Characteristics | High-strength alloy steel, Wear-resistant, Heat-conductive |

## Maintenance & Services

### Product Availability

New • Secondhand • Renovated

### Available Engine Components

- Piston assembly (skirt, head, rings)
- Fuel injection system components
- Exhaust valve assembly
- Connecting rod and crosshead bearings
- Cooling water jackets
