

# UHF Digital TV Antenna for Outdoor Mounting

This antenna is designed for receiving UHF digital signals. It features a unified design for easy installation in small apartments, attics, and balconies.

## Overview

### Optimized UHF Signal Reception

This outdoor UHF digital TV antenna is engineered for high-performance signal reception in compact spaces like balconies, attics, or small apartments. Its unified design ensures straightforward installation while the integrated reflector panel provides excellent resistance to signal interference. Capable of receiving Full HD and digital TV signals, this antenna offers a reliable solution for clear broadcasting.

## Key Features

### Installation & Design

- Unified design for easy installation
- Compact size suitable for apartments, attics, and balconies
- Small retail packaging reduces freight costs
- Reflector panel for interference resistance

## Technical Specifications

### Impedance

**75  $\Omega$**   
Impedance

Frequency Range 470-608/698/790/862 MHz

VSWR 2.5 ratio

## Capabilities

Supported Signals Full HD, Digital TV, UHF
