System Overview

Professional Wireless Audio System

This dual-channel UHF wireless microphone system utilizes advanced PLL and IR sync technology to ensure stable, interference-free audio transmission. Built with high-strength alloy, the receiver and transmitters are designed for durability in professional settings such as KTV projects, stage performances, and large-scale meetings. The system offers versatile microphone options including handheld and lavalier units to meet diverse professional requirements.

Suitable Applications

KTV, Stage Performance, Public Speaking, Conferences, Outdoor Events

Performance Metrics

Technical Performance

200

Frequency Channels

150 m

Max Operating Range

Technical Specifications

Frequency Range	600-900MHz
Frequency Response	80Hz-18KHz
Material	High strength alloy

Connectivity & Compatibility

Output Types

- Independent balance output
- Unbalance mix output

Compatible Microphones

- Handheld
- Lavalier
- Headset
