

UHF True Diversity Wireless Microphone System

This is a professional UHF true diversity wireless microphone system that includes a handheld microphone and receiver. It is ideal for audio applications requiring dependable wireless performance, offering adjustable volume and clear signal indicators.

Product Overview

Professional UHF Wireless Performance

This UHF true diversity wireless microphone system is engineered for reliable, high-fidelity audio transmission in professional environments. With a 200-foot working range and phase-locked loop oscillation control, it ensures consistent signal stability and minimal interference. Designed for versatility, it features both balanced and unbalanced output options to integrate seamlessly into existing audio setups.

Technical Specifications

Frequency Range	600-870 MHz
Frequency Response	40Hz - 18KHz
S/N Ratio	105 dB
Total Harmonic Distortion	0.5 %
Working Distance	200 feet

Connectivity

Output Levels

Connection Type	Max Output Level
Balanced	0-400mv
Unbalanced	0-200mv

Output Connectors	XLR Balanced, 6.35mm Unbalanced
AF Output Impedance	2.2 K Ω
