

UHF TV Antenna for Attic and Outdoor Use

This antenna is designed for both attic and outdoor use, optimized for receiving UHF signals. Its durable construction and weather-resistant materials ensure long-lasting performance.

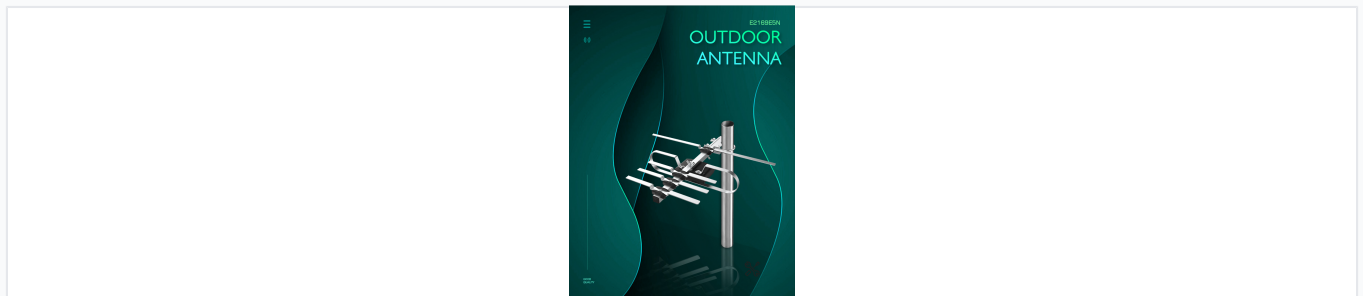

Overview

High-Performance UHF Signal Reception

This UHF TV antenna is engineered for professional-grade reception of Full HD and digital TV signals in both attic and outdoor environments. Its structural design ensures a firm, easy installation while being optimized for high impedance matching and sensitivity. Built to withstand the elements, it features weather-resistant and anti-rust components, making it a reliable solution for long-term over-the-air broadcast access.

Technical Specifications

Performance Features

- High impedance matching
- Strong reception sensitivity
- Adjustable elements for fine-tuning
- VHF and UHF frequency support

Model Number

E2169E5N

Signal Reception

UHF, Full HD, Digital TV, Local UHF Signals

Design & Construction

Durability & Protection

Waterproof • UV Resistant • Anti-Rust • Weather Resistant

Installation Type

Attic or Outdoor

Color

Black

Logistics & Packaging

Logistics Efficiency

- Reduced retail pack size
- Optimized freight cost
- Minimized warehouse space usage
- Shelf-space efficient

Packaging

Color Box

Compliance & Quality

Standards & Certifications

ISO 9001, CE, RoHS, REACH, RED, TUV, SGS, Prop65

Buyer Information

OEM Services

Yes

Sample Policy

Free samples available for evaluation (shipping costs covered by client)
