

UHF TV Antenna for Attic and Outdoor Use

This antenna is designed for receiving UHF signals, ensuring optimal signal reception. Its robust construction features anti-rust, waterproof, and weather-resistant elements for durability.

Product Overview

High-Performance UHF TV Antenna

This versatile antenna is specially designed for UHF signal reception, making it ideal for accessing Full HD and digital TV broadcasts. Its robust, weather-resistant construction allows for reliable performance in both attic and outdoor installations. Engineered with strong elements and a foldable reflector panel, it ensures clear, stable picture quality by maximizing signal capture while minimizing interference.

Technical Specifications

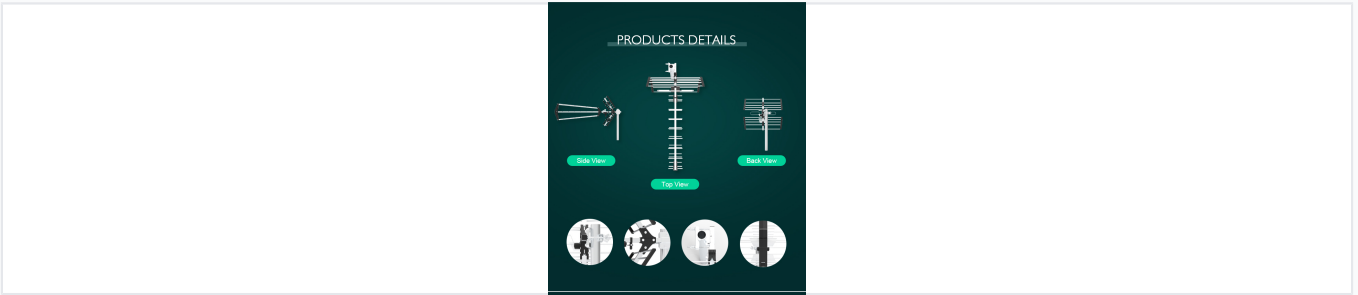

The foldable reflector panel provides excellent resistance to signal interference.

Performance Features

- Long range reception
- High resistance to interference
- Specially designed for UHF signals

Model Number	E2169U3610N
Signal Reception	UHF, VHF, Full HD, Digital TV

Physical Construction

Detailed side, top, and back views of the antenna showing its structural design.

Build Quality

Anti-Rust • Waterproof • Weather Resistant • UV Resistant

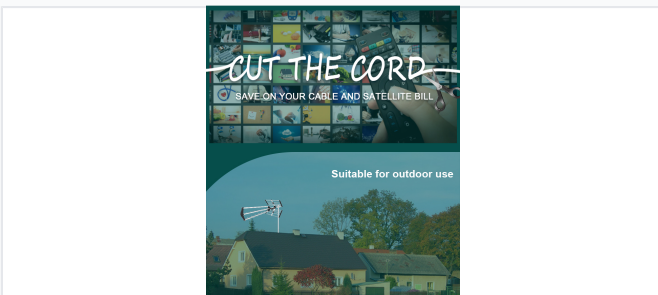

Design Features

- Foldable reflector panel
- Strong elements
- Extra slim packing
- Pre-assembled components

Color

Black

Installation & Logistics

Designed for outdoor use to help users eliminate cable and satellite bills.

Comprehensive logistics support including air, sea, and express delivery services.

Installation Type

Outdoor, Attic

Packaging Type

Color Box

Manufacturing & Quality

Service Capabilities

- OEM/ODM Project Development
- In-house Quality Control (IQC, QC, QE)
- Custom Branding (subject to MOQ)
- Free Sample Evaluation

Quality Certifications

ISO 9001:2015, CE, RoHS, REACH, TUV, SGS
