

UHF Wireless Dual-Channel Microphone System

This UHF wireless microphone system includes a receiver unit with dual antennas and two handheld microphones. The receiver displays frequency information and has volume controls, while the microphones feature built-in displays.

Overview

Professional UHF Wireless Performance

This dual-channel UHF wireless microphone system is engineered for reliable audio performance across a wide 600-870MHz frequency range. With a service range of 50 to 80 meters, it offers excellent flexibility for various professional environments. The system includes two handheld dynamic microphones and a receiver unit, ensuring clear and stable sound transmission.

Technical Specifications

Wireless Service Range

50 M

Minimum Range

80 M

Maximum Range

Frequency Range	600-870MHz
S/N Ratio	80 dB
Modulation Mode	FM
RF Output Power	10 mW

Hardware

Microphone Type

Dynamic Microphone

Channel Capacity	2
Receiver Power Requirement	DC 12V
Microphone Battery Type	3V (1.5V x 2 AA per mic)
Receiver Case Material	Plastic
