Overview

Professional Wireless Audio Solution

The UH-16-MH is a professional-grade digital diversity wireless microphone system engineered for clear and reliable audio transmission. Operating in the UHF band, it utilizes dual antennas to ensure optimal signal stability and reduced interference in challenging environments. With 2x30 selectable channels and auto-synchronization, this system offers the flexibility required for presentations, broadcasts, and professional performances.

Technical Specifications

Frequency Range	480–960 MHz
Channels	60 channels
Operating Distance	60 m
Interference Prevention	Digital Diversity, ID Code Locking, Auto Synchronizing

Connectivity & Power

Power Input

5 V

Voltage

1 A

Current

Available Outputs

- Balanced Output A
- Balanced Output B
- Mix Output

Compliance

Certifications

FCC • CE
