

UHF Wireless Microphone System with Handheld, Lavalier, and Headset Mics

This wireless microphone system features a UHF receiver with dual antennas for stable signal transmission. It includes a handheld microphone, a bodypack transmitter, a lavalier microphone, and a headset microphone.

Overview

Professional Wireless Audio Solution

This UHF wireless microphone system offers a versatile audio solution designed for both professional and personal environments. Featuring PLL synthesized frequency technology, it provides stable and clear signal transmission through dual antenna configurations. The package includes multiple microphone types, making it highly adaptable for presentations, live performances, and recording applications.

Technical Specifications

Frequency Technology	UHF (PLL Synthesized)
Interface Display	LCD for frequency and channel information

Included Components

Transmitter Types

- Handheld microphone
- Bodypack transmitter

Microphone Accessories	Handheld Microphone, Lavalier Microphone, Headset Microphone
------------------------	--

Performance Features

System Capabilities

Dual Antenna • Stable Signal • PLL Synthesized • Versatile Input
