

UL Certified Appliance Connector

This connector is suitable for electric appliances and components requiring UL/CUL certification. It is commonly used in kitchen appliances to ensure safe and reliable electrical connections.

Product Overview

Professional Grade Appliance Connector

This UL-certified appliance connector provides a robust and reliable solution for household and commercial kitchen equipment. Designed to meet strict safety standards including UL817 and CSA C22.2, it ensures consistent electrical conductivity for demanding applications. Its durable construction and flexible customization options make it an ideal component for manufacturers requiring high-quality power distribution hardware.
