

Ultra-HD 4K Video Conference Camera

This UHD camera has an 8.51MP CMOS sensor and provides three outputs. The professional conference camera supports 4K ultra-HD video output, HDMI/HDBaseT interfaces, and 255 presets.

Product Overview

Professional 4K Video Conferencing

This Ultra-HD 4K conference camera features a high-performance SONY 8.51MP CMOS sensor to deliver exceptional 3840x2160 resolution. Designed for professional environments, it offers a 12x zoom wide-angle lens and advanced noise reduction algorithms to ensure clear visuals even in low-light conditions. With versatile output options including HDBaseT, HDMI, and network interfaces, it provides a reliable and immersive communication solution for webinars and boardrooms.

Imaging Performance

Signal-to-Noise Ratio

55 dB
SNR

Sensor Type	SONY 1/2.5-inch 8.51MP CMOS
Maximum Resolution	4K (3840x2160)
Optical Zoom	12 x

Connectivity

HDBaseT Capabilities

- Non-compression transmission
- PoE support
- Control signal channels
- Single CAT5e/6 cable solution

Supported Interfaces	HDBaseT, HDMI, Network, RS232, RS485
----------------------	--------------------------------------

Advanced Features

Noise Reduction	2D Noise Reduction, 3D Noise Reduction
Field of View	70 degrees
