

Ultra-Low Temperature Freezer -86°C

This ultra-low temperature freezer is designed for the safe and reliable storage of biological samples, vaccines, and other temperature-sensitive materials. The freezer maintains a stable and uniform temperature, typically reaching -86°C, ensuring sample integrity.

Product Overview

Ultra-Low Temperature Storage Solution

The DW-UW128 is an ultra-low temperature freezer engineered for the secure storage of biological samples, vaccines, and sensitive materials. Designed for laboratories and medical institutions, it maintains a stable -86°C environment to ensure sample integrity. The unit combines a high-efficiency refrigeration system with robust insulation to minimize energy consumption while maximizing cooling performance.

Performance Specifications

Performance Highlights

-86 °C

Target Temperature

Operating Temperature

-86 °C

Features & Security

Usability

- Digital control panel
- Precise temperature monitoring
- Easy-to-clean interior surfaces

Security Features

Secure Locking Mechanism, Temperature Alarm System, Power Failure Alert

Construction

Build Quality

Durable Construction • High-Efficiency Compressor • High-Performance Insulation
