Product Overview

Ultra-Thin LED Flood Light

This high-performance 100W LED flood light is engineered for both efficiency and durability in outdoor environments. Its ultra-thin lamp body design ensures a modern aesthetic while incorporating extra-thick heat dissipation technology for long-lasting operation. Protected by explosion-proof tempered glass, it provides reliable, bright, and uniform lighting suitable for security, landscapes, and building facades.

Technical Specifications

Power Consumption

100 W

Rated Power

Weather Resistance

IP65

Key Features

Build Quality

- Explosion-proof tempered glass
- Ultra-thin lamp body profile
- Extra thick heat dissipation design

Recommended Use

Security Lighting, Landscape Illumination, Building Facades, Pathway Lighting
