

Ultrasonic Air Humidifier

This ultrasonic air humidifier improves indoor air quality. It features adjustable settings, sleep mode, and a timer function.

Overview

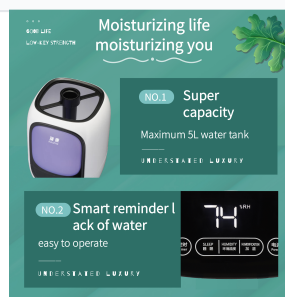

The intelligent ultrasonic humidifier features a sleek design and clear digital interface for humidity monitoring.

Intelligent Ultrasonic Humidification

This ultrasonic air humidifier is designed to create a comfortable indoor environment by eliminating dryness and maintaining optimal humidity levels. Featuring a sleek, modern design with a 5L large-capacity water tank, it provides long-lasting moisture for areas up to 30 square meters. The device integrates smart constant humidity control and a 360° mist nozzle to ensure even distribution and improved air quality throughout the room.

Performance Highlights

Equipped with a 5L high-capacity water tank and a smart touch control panel showing real-time humidity.

Technical Specifications

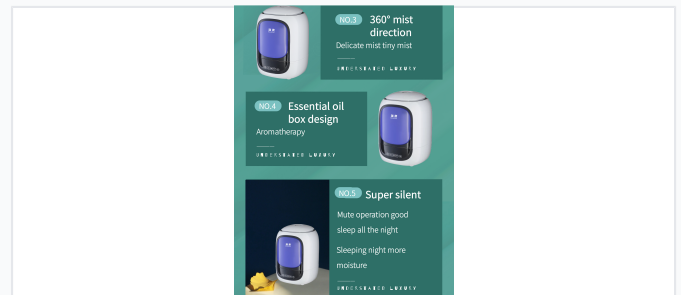

Technical Details

Parameter	Specification
Model Number	JSQ28
Power Supply	AC 110/220V
Power Consumption	28W
Timing Function	Up to 12 Hours
Humidity Display	Digital %RH

Key Features

The top-fill design allows for easy maintenance and refilling without disassembling the unit.

Features a 360° mist nozzle for full room coverage and a dedicated tray for essential oils.

Advanced Features

- Top-fill water design for easy refilling
- Intelligent constant humidity control
- 360° rotatable mist direction
- Dedicated essential oil box for aromatherapy
- Water shortage automatic power protection
- Super silent operation for night use
- Easy-to-clean tank structure

Safety & Modes

Produces a fine, delicate mist that moisturizes the air silently, ideal for office or bedroom use.

Operational Modes

Sleep Mode, Humidity Control, Timer Function, Power Saving, Water Shortage Protection
