

Ultrasonic Cleaner for Jewelry and Eyeglasses

This ultrasonic cleaner is designed for cleaning items using ultrasonic waves. It features a transparent lid, a removable basket, and is suitable for cleaning jewelry, eyeglasses, and other small objects.

Overview

Professional Ultrasonic Cleaning Solution

The SU740 Ultrasonic Cleaner is a high-performance device engineered for precision cleaning of delicate items such as jewelry and eyeglasses. By utilizing advanced ultrasonic cavitation technology, it generates microscopic bubbles that penetrate hard-to-reach areas to effectively remove dirt, grime, and debris. This unit features a user-friendly design with a transparent viewing lid and a removable basket for efficient operation.

Technical Specifications
