

Ultrasonic Cleaning Machine

This ultrasonic cleaning machine is designed for cleaning small objects. It features a stainless steel tank, a transparent lid, and a control panel.

Overview

Professional Ultrasonic Cleaning

This ultrasonic cleaning machine is designed for the efficient cleaning of small objects, utilizing advanced ultrasonic technology to remove contaminants. Built with a durable stainless steel tank, it ensures longevity and resistance to corrosion during intensive use. The transparent lid allows for easy monitoring of the cleaning process, while the intuitive control panel simplifies operation for professional settings.

Design & Build

Tank Material	Stainless Steel
Lid Design	Transparent
Control Interface	Button-based Control Panel

Technical Features

Primary Application Small Objects • Precision Cleaning	
Power Source	Electrical Cord
